About Us

Innovative Solutions for Fabrication Challenges

Founded in 1998, KETEC Precision Tooling is the **largest manufacturer of Punch Press and Press Brake tooling in China and Asia.**

With over 25 years of unremitting efforts in product innovation and development, as well as manufacturing refinement - In 2010, our Punch Press and Press Brake tools were appointed by the government as the industrial standard in China. As the leader of CNC tooling for the sheet metal fabrication industry. Our products have always been well-known **high-quality, customer-centric, and cost-effective.**

Empowering Metal Fabricators with Top-notch Tooling Solutions

Staying competitive in the manufacturing industry means having better flexibility, quality and efficiency while maintaining a sustainable profit.

That's why many manufacturers choose us. Through our unwavering commitment to quality control, refined manufacturing processes, and consultative customer service, we partner with our customers to minimize costs, boost revenue, and sustain their competitive edge.

Milestones

2004

Obtained Certifications

KETEC®'s trademark was registered as an international trademark and obtained ISO certification - **ISO9000:2000**.

2008

Equipped with High Capacity

Experienced tremendous growth and built our current manufacturing facilities **encompassing a total of 13 acres** in Conghua, Guangzhou, China.

2010

Became National Standard

The National Standardization Committee of China **commissioned KETEC to draft the standard** for "Tooling for CNC Turret Punch Machine." In July of the same year, the Ministry of Industry and IT of China issued and implemented the standard **JB/T10928-2010** for "CNC Turret Punch Press Tooling."

2012

Largest in Asia

KETEC became the **largest exporter by volume** and manufacturer of CNC sheet metal tooling in Asia with an annual revenue of **\$45 Million USD**.

2020

Customer Centric

Implemented both **ERP and CRM software** company-wide to better serve our customers.

European Style Press Brake

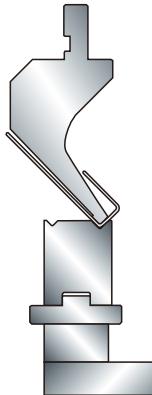

European Precision Style

Ketec's European Precision Style press brake tools are made with premium alloy with in-house heat treatment and laser hardening, Making it forever-lasting for any metal bending application. We offer press brake punches, dies, and accessories in segmented, full-length, and half-length sizes.

Overview

Inheriting the excellent qualities of Ketec's punch press tooling, Ketec press brake tooling uses premium 42CrMo, and incorporates the most advanced processing and heat treatment technologies. All key dimensions achieve a precision of $\pm 0.01\text{mm}$, providing you with optimal bending performance.

• Capability

In 2010, Ketec's new factory, covering 13 acres, was established to specialize in press brake tooling with an annual production capacity of 50,000 units (standard sections).

• Precision

All contacting surfaces of our toolings are formed in a single process, ensuring that the height, angle, and radius of the same model are perfectly consistent. Key dimensions maintain a precision of $\pm 0.01\text{mm}$, guaranteeing assembly accuracy remains unchanged regardless of when the tool is purchased.

• Interchangeability

All of our tooling are interchangeable and will perfectly match with other mainstream manufacturers, to eliminate the need for secondary adjustments to correct errors, saving time during tool changes.

• Durability

All compression and wear areas are treated with laser hardening & heat treatment to 56-60 HRC to meet extreme tolerances and complex requirements.

By using different combinations, various cutting edge distances can be achieved to process different parts. Distance between the tip of the punch and die should not exceed half of the stroke minus the width of the V-groove.

KETEC Tooling cabinet for press brake

Die Opening Selection Formula

| t | Gauge | 12 or less | 11-5/16" | 3/8"-1/2" | 3/8"and up |
|----------|--------|----------------|---------------|---------------|--------------|
| | Inches | 0.105" or less | 0.120"-0.313" | 0.375"-0.500" | 0.625"and up |
| "V"Size | | 6×t | | 8×t | |
| | | 10×t | | 12×t | |

If the above formulas are for reference only.

For more detailed information refer to the chart below.

If the material thickness and inside bend radius are known.

The following can be obtained from the chart below:

Pressure required for bending the material for 1 foot

Opening of the die to be used

Minimum bendable flange length

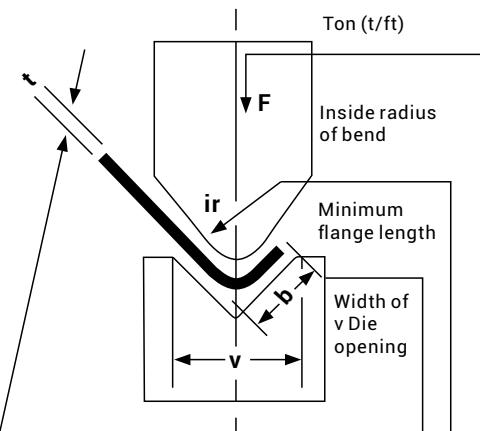

t Material thickness (tensile strength: 56892-71115 lbs/m²)

F Tons per one foot

ir Inside bend radius

b Minimum flange length

v Die opening

| t | Thickness | | | | | | | | | | | | | | | | | | | | v | |
